20B

annual revenue

Assumption Test Plan

Assumption	Risk to project's success	Test
Patient is incentivized to ask physician to approve cheaper drugs	High	Test with 5 patients
It's faster approval when patient, instead of ESI, reaches out to physician	High	Test with 5 physicians

Build Plan

- Patients' mobile app
 - Drug data
 - Recommendation engine
- Physician's approval page
- With ESI's data → tweak recommendation based on:
 - Inventory & delivery time
 - Patients' health history
 - Physician's approval history

The background of the slide is a blurred photograph of three small, clear plastic medicine bottles with white caps, arranged in a row. In front of the bottles, a silver spoon is filled with numerous small, white, round pills. The entire scene is set against a light blue background, which is slightly out of focus to emphasize the text.

Any Question?
